

MANAGEMENT OF SEAGRASS BEDS

WORKSHOP FINAL QUESTIONNAIRE

We have been working on different approaches of seagrass management. WE propose you now to indicate your personal preferences. Individual answers will be confidential. Only aggregated results will be disseminated.

Name:

For each of the approaches discussed, we ask you to score according to your opinion on two aspects:

- How much you wish the approach to be used?
- Do you think the approach is feasible?

Echelle :

| 1 | 2 | 3 | 4 | 5 | 6 |
|----------------------|----------------------|--------------------|-----------------|----------------------------|--------------------|
| totally agree | tend to agree | shared view | disagree | do not agree at all | do not know |

| | I wish the approach to be used | I think the approach is feasible |
|--|--------------------------------|----------------------------------|
| Approach 1 (based on WFD evaluation results) | | |
| Approach 2 (protect seagrass beds everywhere they have already been observed) | | |
| Approach 3 (protect seagrass where there are not much activities impacts and pressures) | | |
| Approach 4 (identify strategical sectors based on a multicriteria approche, where to focus the seagrass protection) | | |
